

Subject: purchase bot for Bayern München “Zweitmarkt”.

We want to attend the game of Bayern Munich but it is super hard to catch the tickets. There is still hope:

The Bayern München Zweitmarkt is a secondary ticket market where ticket owners can resell their ticket in case they can't attend a game. For this ticketmarket I want a spinner bot that will purchase tickets.

The script should be able to:

- Automatically select a available ticket
- Automatically click the “add to cart” button when a ticket is available
- Bot should have a simple gui (chrome extension).
 - * turn on turn off

So in practice:

Detect how many “listings” <tr> are there, suppose 3:

1. Click an available ticket
2. Click “to the cart” button

<unsuccessful>

1. Click an available ticket
2. Click “to the cart” button

<unsuccessful>

1. Click an available ticket
2. Click “to the cart” button

Ctrl+ r (refresh)

< start over >

Optionally:

- Detect the 5 second countdown to avoid refreshing during the countdown
(refreshing during the countdown results in a new five second countdown)
- Safari extension

Images for clarification
